Live demos & code — see it in action

PROFESSIONAL SUMMARY

Software engineer with 5+ years designing, building, testing, and maintaining new and existing solutions — web, full-stack, and cloud-hosted integrations — that meet business requirements and ship with high quality. Strong across Python, C#, JavaScript/React, and FastAPI with SQL and NoSQL databases, owning features end to end from design and implementation through automated testing and deployment. Contributes to technical architecture, writes specs and design docs, participates in peer code reviews, and communicates clearly to technical and non-technical partners on cross-functional Agile/Scrum teams. Recently built **Relay**, a full-stack React + FastAPI cloud app that mirrors this role's core work — see it live at israeljortiz.com.

PROFESSIONAL EXPERIENCE

Software Engineer | SUCCESS Magazine

Apr 2023 – Present

Washington, DC (Hybrid)

- Designed, developed, tested, and deployed new and existing features across a full-stack React + FastAPI application hosted in the cloud, meeting business requirements in line with IT development standards.
- Contributed to technical architecture and data-model design, wrote product specifications and design documentation, and led peer code reviews, and participated in IT architecture and standards reviews.
- Built automated unit and UI tests and practiced test-driven development, strengthening release quality and reducing production defects.

Founder & Lead Engineer | Ambrose

Jul 2021 – Present

Part-Time · Remote

- Built a highly scalable full-stack product from the ground floor in Python (FastAPI) and React, owning architecture, implementation, and cloud deployment.
- Established automated testing and CI/CD — unit, UI, and functional tests — and enforced code-review and development standards as the team scaled.
- Authored design documentation and technical white papers and presented technology recommendations to stakeholders.

Software Developer / Team Lead | SPCA International

Sep 2020 – Mar 2023

Team Lead · Washington, DC

- Led a 4-engineer Agile/Scrum team delivering web applications and integrations, running sprint planning, standups, and retrospectives while staying hands-on.
- Designed and maintained SQL and NoSQL data solutions and cloud-hosted services, applying strong debugging and problem-solving to complex production issues.

Freelance Software Engineer | Independent / Contract

Feb 2019 – Jun 2021

Solo client work prior to founding Ambrose · Remote

- Delivered full-stack web and integration solutions for multiple clients — handling design, implementation, automated testing, and deployment end to end across cloud and on-premises environments.

SELECTED PROJECT

Relay — full-stack React + FastAPI integration dashboard, cloud-hosted with CI/CD

[demo](#) | [GitHub](#)

- End-to-end React + FastAPI app deployed to the cloud that unifies multiple data sources behind a REST API, with automated unit/UI tests, TDD, and a CI/CD pipeline — mirroring this role's design → build → test → deploy workflow.

TECHNICAL SKILLS

Languages: Python, C#, JavaScript/TypeScript, Java, HTML/CSS, SQL

Frameworks & Web: React, FastAPI, Node.js, .NET, REST APIs, full-stack & responsive UI

Databases & Cloud: SQL Server, Oracle, MySQL; Cosmos DB, Redis (NoSQL); Azure, AWS, Google Cloud; CI/CD; Windows/Linux

Practices: Agile/Scrum & Kanban, TDD, automated unit/UI/functional testing, peer code review, architecture & design docs

EDUCATION

Virginia Tech — M.Eng., Computer Science (Software Engineering)

2023 – 2024

GPA 4.0 · Full-Ride & Tech Talent Investment Program (TTIP) Scholar

University of Mary Washington — B.S., Computer Science & Mathematics (Double Major)

2019 – 2022

GPA 3.8 · Dean's List 7/8 · FBLA Collegiate Chapter President & Founder · 1st Place, University-Wide Coding Competition · Honor Board Treasurer

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate • AWS Certified Developer – Associate • Certified ScrumMaster (CSM)
